

MARYAM YAHYA

BSCS STUDENT – ASPIRING FRONTEND DEVELOPER

Lahore, Pakistan • 03314250080 • maryamyahya.pk@gmail.com

Aspiring Frontend Developer with hands-on expertise in building responsive, user-friendly web applications and digital experiences. Skilled in modern web technologies, frontend development best practices, and translating design concepts into functional solutions. Adept at collaborating with cross-functional teams to deliver high-quality, scalable, and performance-driven web applications.

Notable Strengths:

- ✓ **Technical Skills:** Proficient in frontend development, responsive web design, modern web technologies, API integration, and interactive user interface development.
- ✓ **Problem Solving:** Strong ability to identify issues, troubleshoot challenges, and implement effective technical solutions.
- ✓ **Communication:** Capable of clearly conveying ideas and collaborating with stakeholders, developers, and designers to achieve project goals.
- ✓ **Analytical Mindset:** Skilled at evaluating requirements, interpreting technical information, and making data-driven development decisions.
- ✓ **Team Collaboration:** Effective team player with an ability to engage with cross-functional teams in delivering key outcomes.
- ✓ **Continuous Learning & Improvement:** Committed to expanding technical expertise, adopting industry best practices, and staying current with emerging technologies.

Programming Languages: C, C++, PHP

CS Fundamentals: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Database Systems (DBMS)

Databases: SQL, MySQL, CRUD Operations

Tools & Version Control: VS Code, Git, GitHub

Core Web Skills: Frontend Development, Responsive Design, Interactive UI Development

KEY PROJECTS

Clothing E-Commerce Web Application: A fully responsive e-commerce web application designed to simulate an online clothing store experience. The platform features modern UI layouts, product sections, and smooth navigation across devices.

- Engineered a frontend e-commerce interface utilizing HTML5, CSS3, and JavaScript to ensure cross-device compatibility.
- Implemented interactive UI components and optimized layouts for enhanced user experience and smooth navigation.

Amazon UI Web Clone: A frontend clone of the Amazon homepage designed to replicate real-world e-commerce UI structure and behavior. The project includes complex layout sections, product grids, and interactive elements.

- Developed a pixel-perfect replica of the Amazon homepage interface, focusing on complex layout structures and behaviors.
- Programmed dynamic features using JavaScript, including horizontal product scrolling carousels and navigation dropdowns.

Personal Portfolio Website: A responsive personal portfolio website showcasing technical skills, projects, and development experience in a structured and visually appealing format.

- Designed and deployed a responsive personal portfolio website using HTML, CSS, and JavaScript to showcase technical projects and skills.
- Utilized Git and GitHub for version control and repository management throughout the development lifecycle.
